AIMS AND PURPOSES OF THE AMERICAN BEGONIA SOCIETY

The purpose of this Society shall be:

TO stimulate and promote interest in Begonia and other shade-loving plants;

TO encourage the introduction and development of new types of these plants;

TO standardize the nomenclature of Begonia;

- TO gather and publish information in regard to kinds, propagation and culture of *Begonia* and companion plants;
- TO issue a bulletin which will be mailed to all members of the Society; and
- TO bring into friendly contact all who love and grow Begonia.

A MESSAGE FROM THE PRESIDENT

I wish each of you a good begonia growing year. Late this summer the Convention will be held in New York. I am personally looking forward to meeting many members from the east. Let's all attend to make this the best show the ABS has ever had.

An increase in the cost of producing the *Begonian* has been announced by the printer. I would like your opinions on the following three proposed courses of action:

- 1. Continue to publish a 28-page *Begonian* monthly and increase the dues by approximately \$2.00 a year to handle the increased costs.
- 2. Publish a 28-page *Begonian* every other month with no increase in dues.

3. Publish the *Begonian* as a 28-page bimonthly bulletin with some additional color pages at a dues increase of approximately \$2.00 a year.

Please let me know how you feel. I will present your recommendations to the Board of Directors to study along with other factors. Your other comments and suggestions are welcome. A prompt reply would be appreciated. My address is a new one:

10079 W. Lilac Rd.

Escondido, CA 92026

The financial situation can be helped by increasing the membership. Let your growing friends know what a great plant group begonias are and encourage them to join the ABS.

Nathan Randall, President

GOLDEN MEMORIES

By Elda Haring

Gold may no longer be found in "them thar hills" of Sacramento but we retain memories of many golden moments at the National Convention of ABS the weekend of the 16th of September. We were no sooner settled in our rooms at the elegant Red Lion Inn when a welcoming committee of the Convention Chairman, charming Joan Coulat and her cohostess Linda Luckett, old friends Lou and Marie Thompson, Pam Mundell and her husband, along with several other very friendly folks, stopped in to greet us. Their enthusiasm and admiration of the 50 rooted cuttings we had brought for the seminar on propagation completely dispelled any trepidations I had about addressing so many experienced and knowledgeable members of ABS.

Golden memories of being with so many old friends; Thelma O'Reilly and Tim, the Lees, the Frosts, the Zeisenhennes, Hazel Snodgrass and dear friends Louise Bower and Hattie Lee Keller, the Tillotsons, Dora Hale, Shirley Wilson and so many others in the Sacramento area. Being greeted by Glenn and Ilo Maynard; meeting again Jack and Dottie Golding and our dear friend Joy Logee Martin of Danielson, Conn., the Texas contingent and Helene Jaros and her son Charles of Miami.

Golden memories of time spent with our editors, Ed and Phyllis Bates; with outgoing President Charles Richardson and his wife, Naomi; and with handsome Nate Randall our incoming President and his charming wife, Hester; old friends the Corwins, the Estradas and Robin friends Carolyn Collman and Pat Maley; young Linda Miller, our Seed Fund Chairman, and her charming assistant Diane Fries. The excitement of meeting so many other Robin friends, too numerous to mention.

That golden moment when I stood in front of a room packed with enthusiastic friendly members for my demonstration; the fun I had speaking to them and the applause that followed. So many memories of a happy and exciting weekend. The seminars, the Beautiful Begonia Show arranged and staged by many willing workers. Having helped to put on many a flower show, Walt and I know of the many problems that arise behind the scenes but our Convention Committee took them in stride — ever good humored, ever smiling — though feet and backs were aching.

Memories of chatting with and meeting so many wonderful people in the Hospitality Suite, charming Claire Husted whose photo of a tuberhydrida adorns the front cover of *Begonias for Beginners*, and her lovable friend Cathy Nelson, Jim Elin, the Golds, Wanda Elin and so many others.

Our thanks to Sacramento Branch and all the others who worked so hard for giving us a most exciting and happy weekend. We shall ever cherish these memories of golden days in Sacramento.

An article based on the seminar mentioned will appear soon.

BEGONIA BONANZA

Elegant topiary trees constructed from fresh, brilliant tuberous begonia blossoms were table decorations at the banquet.

The Sacramento Prospector appeared on the programs and publicity for the Convention and now offers "nuggets" from the activities presented there.

Among the many items at the Begonia Boutique were silk-screened T-shirt with design by Pat Graves on left and handpainted begonia on T-shirt by Darlene Fuentes.

As master of ceremonies, Tim O'Reilly regaled the audience with his continuing story about the plants around his home, the only leering begonias on record. He conducted geographic roll call with the response being an exuberant waving of the table napkins.

Ralph Corwin presented retiring president Charles Richardson with implement to chase bears on his new rancho.

Dr. Ernest Weitz of the Sacramento Branch installed officers Eleanor Calkins, Virginia Barnett, Douglas Frost, Ralph Corwin, Gilbert Estrada, and Nathan Randall.

On the following two pages are views of groups of conventioneers from Glendale, Ventura, Santa Barbara, Tucson, Dallas, Sacramento, Miami, Portland, Seattle, Boston, Whittier.

Volume 46 • January 1979

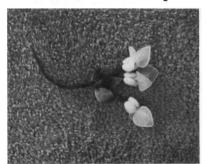

Awards Chairman Thelma O'Reilly presented Flower Show awards to exhibitors. On left, Mabel Corwin accepted certificate for cultural excellence. At right, Clarence Hall, past president par excellence of the Sacramento Branch, pulled up a chair to be on hand to accept awards for many branch members who were at work behind the scenes during the presentations.

Paul and Margaret Lee, winners of the Dyckman medal, were photographed by the trophy table. Jack Golding was recipient of the Eva Kenworthy Gray award and Chester Nave received the Alfred D. Robinson medal for *Begonia* 'Boutique'.

Lou Thompson, veteran salesman at ABS shows, guided hard working team which handled over ten thousand plants.

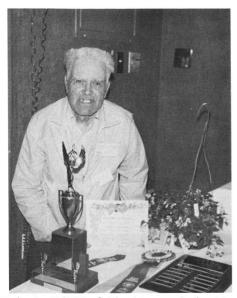

Begonia jordan-almondii, a new discovery that first appeared at the banquet, has exceptionally large blossoms. The ovaries are pink while the petals themselves are filmy white. The leaves are shaped similar to rose leaves and are of a felty texture. The stems could only be described as wiry. Scott Hoover, who tested them in the name of science, proclaimed them edible and even tasty. The succulent blooms were prepared by Alice Gold and her committee.

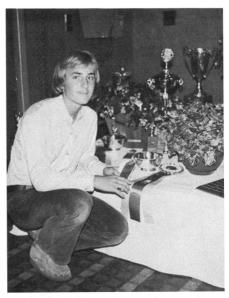

Diane Fries and Linda Miller handled Seed Fund while Elizabeth Sayers distributed convention packets individually decorated with begonia drawings.

Gil and Frances Estrada sold ABS books including English text of Japanese book on begonias recently completed by Marguerite De Cola and Hikoichi Arakawa.

Left: Leslie Woodpiff with awards for his new hybrid, B. 'Tiny Gem', winner of the William Bower memorial trophy. Right: Keith Mautino won trophy for the best semperflorens entry for Begonia 'Charm'. Twenty-two trophies were presented.

Above: Carrie Karegeannes presented one of eight seminars, used slides of rare old drawings and art to illustrate her talk. Right: Shirley Wilson, whose collection was viewed on the tour, bids fare well to all.

1978 SHOW COMMITTEE

Now that the 1978 National Convention, Begonia Bonanza, has come to an end, I would like to thank all the wonderful people that worked so hard to make it a great success.

We were fortunate enough to have guests from Oregon, Florida, New Jersey, Virginia and North Carolina to name a few, and others attending for the first time came from as far away as Japan and British Columbia.

Joining together old friends and new acquaintances made this Convention a most memorable one. Show Chairman: Joan Coulat Speakers & Seminars: Chuck Richardson

BEGONIA MANNII.

Mr. Mann's Begonia.

Nat. Ord. BEGONIACEÆ. -- MONŒCIA POLYANDRIA.

Gen. Char. MASC. Calyx 0. Corolla polypetala, petalis plerumque 4, inæqualibus. Fæm. Calyx 0. Corolla petalis 4-9 plerumque inæqualibus. Styli 3, bifidi. Capsula triquetra, trilocularis, polysperma.

Begonia Mannii; erecta, succulenta, bipedalis, foliis æquilateralibus ovatis acuminatis irregulariter remoto-serratis supra glabris subtus discoloribus minutissime copiose punctulatis, petiolis breviusculis costisque subtus rufo-hirsutulis, stipulis lanceolatis, pedunculis glomeratis subtrifloris axillaribus, floribus tetrapetalis roseis, petalis 2 minoribus, staminibus arcte in conum imbricatis, ovariis capsulisque cylindraceis minute squamulosis, 4-locularibus, stigmatibus lineari-clavatis.

We have above given only the old generic character of Begonia, as considered in its integrity. The late Dr. Klotzsch has, in his 'Essay on Begonia,' formed several new genera, chiefly of American species, and M. De Candolle is far advanced with his materials, from a complete study of most ample suites of species and specimens of the family for a forthcoming volume of the 'Prodromus.' A new form among Begoniacea has lately been discovered by Mr. Mann, is tropical, viz. the B. prismatocarpa, figured at Tab. 5307 of this work (vol. 88, for 1862), possessing an elongated, pod-like 4-celled capsule, quite destitute of wing! We are since in possession of two other West African species, with the same character, from the same indefatigable collector, of which one is here given. It was introduced living to Kew Gardens, in 1862, and was found on the Peak of Fernando Po, at an elevation of not more than 1300 feet above the level of the sea.

Descr. Epiphytal. Stem succulent, one and a half to two feet high, unbranched in our specimens, and glabrous. Leaves four to five inches long, petiolate, ovate, acuminate, scarcely perceptibly unequal-sided, distantly and irregularly subdentate, pen-

максн 1 st. 1864.

niveined, glabrous above, beneath minutely punctated with very minute scale-like dots. Petiole one to two inches long, and the costa beneath, rufo-pubescent. Stipules large, membranaceous, subulato-lanceolate, deciduous. Peduncles axillary, short, fascicled, bearing from two to three flowers and a bract beneath them. Petals four, rose-colour, two larger subovate, two smaller oblong-linear. Male fl. Stamens sessile, arranged in a closely imbricated cone-shaped mass. Fem. fl. with a nearly cylindrical tomentose ovary: tomentum mixed with laciniated scales. Capsule more than an inch long, siliquiform. Styles four, linear-clavate (not capitate).—The elongated inferior ovary, crowned with four spreading rose-coloured petals, very much resemble the flower of an Epilobium with irregular petals.

Fig. 1. Male flower. 2. Cluster of stamens. 3. Portion of a stem with bracts and flowers. 4. Styles. 5. Seed-vessel. 6. Transverse section of the same. 7. Scale from the surface of the capsule:—magnified.

COMMENTARY ON TAB. 5434

By Fred A. Barkley, Tecumseh, Oklahoma

In the eighteenth and nineteenth centuries, there were several periodicals publishing colored illustrations of plants. The best known and longest lived was one published at Kew Gardens: *Curtis's Botanical Magazine*.

In 1864 in volume 20 of the third series (and volume 90 of the whole work) was published, among many plants of several families, as Plate 5434, Begonia mannii Curtis.

The presentation of the descriptions of this species is given here to illustrate the treatment of the species, which was given both in Latin and English.

As will be seen the descriptions were very detailed, and leave little to be added after a century. The plants are said to be epiphytic on the branches of trees in their native habitat, but grow excellently in soil. The staminate and pistillate flowers rarely appear at the same time on a plant; each plant produces both staminate and pistillate flowers but at different times. The long, terete ovary becomes soft-succulent as it matures (in contrast to the papery dry fruit of most *Begonia*).

Begonia mannii Hooker f. is the type species of the Section Tetraphila A. DC. This group contains approximately thirty-five species, all native of

tropical Africa. Several species of it are in cultivation.

The writer is grateful to the Library of the Gray Herbarium of Harvard University for furnishing xerox copy of the material from the original publication.

BEGONIA QUESTION BOX

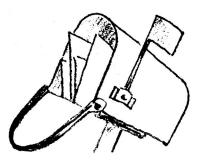

Write to: Elda Haring

Box 236, Flat Rock, NC 28731 You will receive a prompt personal reply.

Question: What is the best way to root hirsute begonias? Answer: Hirsute begonias root as readily as any other variety. If you find they rot under the conditions in your plant room, make sure the propagation medium is uniformly damp but not saturated, and do not cover with plastic bag or lid. Using Rootone F which contains a fungicide might help but do read instructions and use exactly as suggested on the package. Some members gently remove the hairs on the stems with fingernails before inserting in mix but I do not recommend this method to beginners for fear they might damage the cutting.

Question: I have heard that putting a stem of coleus into a vase with a begonia cutting which I want to root will stimulate the begonias to root faster. Is this true? Answer: I have never proved this to my satisfaction. However, make your own test by taking cuttings from the same plant as identical in size as is possible. Put one cutting in water with the stem of coleus, the other in water alone. Keep a record of when roots appear and how fast the plants progress after being potted. I'll be interested in your results.

Question: Are aquarium begonias grown best under artificial or natural light? Answer: Artificial light is preferred by many growers. If natural

light is very bright there is no reason they cannot be grown in this manner. A note of caution, however, never place closed terrariums in the sun for the interior might heat up to a disastrous degree and damage the plants.

Question: I recently purchased a B. 'Silver Jewel' in a terrarium. Can I grow it in a greenhouse instead of the terrarium? Answer: Although many growers on the west coast grow B. 'Silver Jewel' in a terrarium, I have found that it grows very well in a greenhouse without cover if humidity is at least 40 percent or above. The one purchased in a closed container, however, would first have to be conditioned to outside air by pulling the top aside gradually, eventually leaving it off to accustom it to the different conditions that would prevail in your greenhouse.

Question: Why does a part of a leaf, especially on large canes and rexes suddenly become transparent, go limp and rot? Answer: Leaves on begonias become transparent if the rootball is too dry or the plants are getting too much sun or both. In your case, however, I would suspect that the plant has been possibly overwatered. Remove from pot and inspect the roots and repot in fresh soil either in the same size pot or in one size smaller, cutting off the bottom 1/4 of the rootball to give it

fresh medium. Pay strict attention to proper watering methods. Do not let it become bone dry before watering. So long as the leaves seem crisp the plant likely has sufficient water. If they feel at all limp the rootball has been permitted to become too dry.

Question: I have B. carrieae seedlings that grew from the Seed Fund which have grown well until now. The plants are several inches tall and not doing well. Leaves cup under and stems sag. Is B. carrieae all that fussy? I had heard that begonias grown from seed are more likely to adapt to my growing conditions than cuttings or plants brought in from elsewhere. Answer: If the plants have been properly watered, cupping of leaves could indicate that this particular species needs higher humidity than it is getting. As B. carrieae is a spreading plant "sagging" of the stems would indicate that it is merely assuming its normal shape. It is not necessarily true that seedling grown plants adapt better than plants brought in from elsewhere as some begonias need specific requirements as to temperature and humidity which must be met in order for them to thrive.

REGISTRATION OF BEGONIA CULTIVARS

Rudolf Ziesenhenne, Registrar

For the past sixteen years the American Begonia Society has had as its Nomenclature Director, Rudolf Ziesenhenne. For much longer than that Rudy has been a friend of the people who love and grow begonias. As President of the ABS I wish to extend the heartfelt thanks of the ABS membership for the many untiring hours he has devoted to the cause of the plant he loves. It is my hope that he will continue to serve his numerous friends in the Society with his vast knowledge. though he will be busy working toward publishing of new species and writing a book.

Nathan Randall

NOTE: The American Begonia Society is the International Registration Authority for cultivars of the Genus Begonia. Information regarding registration may be obtained from the ABS Nomenclature Director.

No. 695 — Begonia (parents unknown) 'Dollar Down'

This rhizomatous rex cultorum was developed by Leslie Woodriff in 1977, has not yet bloomed, and will be first distributed in 1979 by the originator, 1100 Griffith Rd., Mc-Kinleyville, CA 95521. Leaves are satiny, red, double spiraled, deeply cut; 11/2 x 2"; margin is deeply cut; texture satiny finish; 4-nerved; petioles red. Is described as a miniature. Registered Sept. 4, 1978.

No. 696 — Begonia (parents unnamed rex) 'Super Curl'

Developed in 1976 by Leslie Woodriff, address above, this rhizomatous rex cultorum plant bloomed and was first distributed in 1977. Leaves have a black center, light purple and silver band, with a black edge around the entire leaf; spiraled; 8 x 9"; texture satiny. Flowers are white with light pink on back of petals; 11/2 x 2"; blooms year around on 10" flower stem. Registered Sept. 4, 1978.

No. 697 — Begonia (parentage unknown) 'Woodriff's Tricolor'

Distinguished by its red silver banded leaves with green outside and black band on edge, the rhizomatous rex cultorum begonia was developed by Leslie Woodriff, address above, and first bloomed and distributed in 1977. The spiraled leaves grow up to 15", but normally are between 10 and 12"; texture is firm; 7-nerved; petioles red and stipules light red. Flowers not described. Registered Sept. 5, 1978.

No. 698 — Begonia (B. 'Patty Sweet' x B. socotrana X herbacea) 'Pink Dream'

A tuberous hiemalis begonia whose mature stem is 12", this plant was developed and first bloomed in 1977 and was first distributed in 1978 by the originator, Leslie Woodriff, address above. Leaves are bright green, $4 \times 5''$. Flowers are deep pink like B.

MOST UNUSUAL Succulents . Cacti . Begonias

Mailing Address: Nursery Address: 1860 Fearn Ave. 1139 - 16th St. Los Osos, California 93402 • (805) 528-4267

socotrana, one inch, arranged in hanging clusters on a 3" hiemalis type stem; blooms year around. Registered Sept. 4, 1978.

No. 699 — Begonia (unnamed tuberous hybrid X B. herbacea) 'Ever Reddy'

Described by the originator, Leslie Woodriff, address above, as "perhaps the most important breakthrough in begonia breeding to date," this tuberous begonia was developed and first bloomed in 1977 and first distributed in 1978. Leaves are dark green, shaped like those of *B. herbacea* only wider, 3 x 6"; margin is slightly serrate; texture smooth; 4-nerved; petioles green. Flowers are red, shaped like a double camellia, 2½"; arranged in clusters on 4" flower stem, blooming year around. Registered Sept. 4, 1978.

No. 700 — Begonia (B. 'Patty Sweet' x German hiemalis X B. socotrana) 'Radiant Pink'

This tuberous hiemalis begonia reaches an 8" mature stem; developed by Leslie Woodriff, address above, in 1977, it first bloomed and was first distributed in 1978. Leaves are dark green, heart shaped, 3 x 4"; margin is slightly serrate; texture is firm, waxy; petioles are pink; stipules are light red. Flowers are dark pink, double camellia type; 3"; male 25 petals; arranged in clusters on 6" stem, blooming year around. Registered Sept. 4, 1978.

No. 701 — Begonia (B. solanthera x B. limmingheana) 'Splotches'

Different because of its splotched leaves and profusion of pink flowers in spring, this cane-like trailer has 5' mature stems, according to the originator, Leslie Woodriff, address

above. Developed in 1976 the plant first bloomed and was distributed in 1977. Leaves are medium green with white splotches; $2\frac{1}{2} \times 3\frac{1}{2}$ "; margin is smooth; texture slick and firm; 5-nerved; petioles light red; stipules green. Dimension of flower 1" on 3" stems. Registered Sept. 4, 1978.

No. 702 — Begonia (parentage unknown) 'Rainbow Tree'

"This 22" upright double spiraled rex would make an excellent addition to a begonia collection," remarks the originator in describing how the begonia differs from others of its type. It has a rhizome-like, erect stem. A rex cultorum, the plant was developed by Leslie Woodriff, address above, in 1977 and was first distributed in 1978; it has not yet bloomed. Leaves have a black center, an olive-green zone with red and silver spots like a rainbow, and a black edge; 8 x 11"; margin irregular; 10-nerved. Registered Sept. 4, 1978.

No. 703 — Begonia (B. molleri x B. polygonoides) 'Moly Poly'

Originated in 1977 and first bloomed in 1978, this cane-like trailer has not yet been distributed by its hybridist, Leslie Woodriff, address above. Leaves are medium green, heart shaped, 1½ x 3"; margin is entire; texture smooth, waxy; petioles are green. Flowers are white, shaped like those of *B. molleri*, with small, round seed capsules; blooms year around on 3" flower stem. Registered Sept. 4, 1978.

No. 704 — Begonia (B. solananthera x B. prismatocarpa X B. socotrana) 'Pink Chaser'

Explaining the significance of the name, the originator of this cane-like trailer states, "The male flowers chase one another down the pedicel, sometimes 40 flowers, before a seed flower ends the chase." Developed by Leslie Woodriff, address above, in 1976, it first bloomed and was distributed in 1977. Mature stem reaches 3'. Leaves are medium green; leaf shape, flat, round; 41/2 x 5"; margin smooth; texture firm and waxy; 7nerved; petioles are green; stipules small, pink. Flowers are deep pink, shaped like those of B. socotrana; 1/2 x 2"; male petals 4, female 5; arranged in hanging clusters on a 13" flower stem; blooms year around. Registered Sept. 4, 1978.

No. 705 — Begonia (unnamed rex x unknown) 'My Valentine'

The spiraled leaves with silver background and centered red heart distinguish this rhizomatous rex cultorum; the $6\frac{1}{2} \times 10''$ leaves are rededged with a smooth margin slightly cut with points, 12-nerved; petioles 12", red; stipules red. Flowers are a medium pink, 1", on 7" flower stem, blooming year around. Registered Sept. 4, 1978.

No. 706 — Begonia (B. 'Tiny Orange Rubra' x B. solananthera) 'Tiny Gem'

Described as a miniature angelwing, this cane-like trailer was developed and first bloomed in 1977 by Leslie Woodriff, address above; it was first distributed in 1978. Leaves are medium green, narrow-oblong, 1½ x 3½"; margin cut and wavy; texture waxy and firm; 5-veined; petioles light green; stipules light pink. Flowers are pink, shaped like B. 'Orange Rubra'; one inch; male 4 petals; female 5; arranged in clusters on 3" stem, blooming year around. Registered Sept. 4, 1978.

No. 707 — Begonia (B. 'Patty Sweet' x unnamed tuberous hybrid) 'Pink Princess'

Originated by Christine Kemp, Rohnerville Rd., Rohnerville, CA 95540, this ruffled tuberous begonia was developed in 1965 when it first bloomed and will be distributed in 1979 by Leslie Woodriff, 1100 Griffith Rd., McKinleyville, CA 95521. The heart-shaped leaves are dark green, 31/2 x 5"; margin serrated; texture waxy with fine white hairs on reverse; 6-nerved; petioles red; stipules light green. Flowers are light pink, double ruffled, 5"; male petals 50, female 5; arranged in clusters of 3; flower stem 10"; blooms spring, summer and fall. Registered Sept. 4, 1978.

No. 708 — Begonia (B. incarnata x B. solananthera) 'inca Princess'

This cane-like trailer, originated in 1976 by Leslie Woodriff, address above, first bloomed and was first distributed in 1977. Leaves are medium green, heart shaped; margin slightly serrate and wavy; firm textured; 5-nerved; petioles light red with white spots; stipules light green. Flowers are described as very deep pink, 1", male petals 4, female 5; arranged in large clusters on 3" flower stem, blooming year around. Registered Sept. 6, 1978.

No. 709 — Begonia (B. 'Red Planet' x B. carolineifolia) 'Nightmare'

Leslie Woodriff, address above, developed this rhizomatous with rhizome-like erect stem, in 1977 and will distribute it in 1979. Leaves are dark maroon with brown markings, star shaped, 8 x 9"; margin moderately cut; texture smooth; 6-veined; petioles light green. Has not yet bloomed. Registered Sept. 4, 1978.

No. 710 — Begonia (B. 'Cleopatra' x B. socotrana X unknown) 'Egyptian Princess'

Developed by Leslie Woodriff, address above, and first distributed in 1978, this rhizomatous stem erect plant has dark olive-green leaves with brown markings, star-shaped, 8 x 8½"; margin deeply cut; texture smooth, waxy; 6-nerved; red petioles. It has not yet bloomed. Registered Sept. 6, 1978.

No. 711 — Begonia (B. 'Madame Queen' x B. 'Bokit') 'Winkey's Bronze'

This rhizomatous plant originated by Leslie Woodriff, address above, in 1977, will be distributed in 1979; it has not bloomed yet. Leaves are medium brown, double spiraled, round; $51/2 \times 51/2$ "; margin smooth; texture curly, satin finish; 7-nerved; petioles green. Registered Sept. 6, 1978.

No. 712 — Begonia (unnamed tuberous hybrid x B. socotrana) 'Woodriff Red'

Twelve-inch stems of this tuberous hiemalis begonia bear throughout the year clusters of vivid red flowers 2-4" across. Developed by Leslie Woodriff, address above, in 1975, it first bloomed in 1976, and distributed in 1977. Leaves are dark green, flat, oval, 5 x 6"; margin slightly serrate; texture firm and waxy; 7-nerved; petioles green; stipules light green. Flowers are double camellia type, average 3"; male petals 20, female 4 and very sparse; arranged in hanging clusters on 5" stem. Registered Sept. 11, 1978.

No. 713 — Begonia (B. bowerae x B. 'Zip') 'Green Turnip'

Green leaves with black edge and pink-to-red center distinguish this rhizomatous begonia originated in

1976 by Bob Cole, 18007 Topham, Reseda, CA 91335. It first bloomed and was distributed in 1977. Leaves are described as entire-subentire; 23/4 x 2"; margin ciliate; texture smooth; 8-nerved; petioles 5 - 8"; stipules 1/2 x 1/2". Flowers are pink, typically rhizomatous. Registered Sept. 20, 1978.

Notice to Book Purchasers

If you purchased a copy of the English version of Begonias by DeCola/Arakawa at the Sacramento Convention, you should check to see that all the pages are included. There should be a title page, a short statement of publication, the preface, a section entitled "How This Text Came to Be" and one entitled "For the Readers of This Book" before the table of contents and the body of the text.

If your copy is incomplete, contact the ABS Bookstore Manager.

The Indoor Light Gardening Society of America, Inc., Dept. B, 128 West 58th St., New York, New York 10019. Dues \$5.00. Bi-monthly magazine LIGHT GARDEN; cultural guides; seed exchange; round robins; chapters; slide library.

BEGONIA BULLETIN BOARD

Old Begonians

Katharine Alberti is the new librarian for handling past issues of the Begonian. She has inventoried the reserve and reports that a few years are in short supply. Much interesting information is included and is as valid as ever, though, of course, there are some items that have been updated and changed over the years. You may purchase any full year from 1940 for \$6.50 or individual copies for 75¢ each. (Foreign postage is extra.) Mrs. Alberti will be happy to accept contributions of old issues for resale. Her address is 3322 Troy Drive, Hollywood, Calif. 90068.

The membership secretary will continue to handle orders for issues that are less than a year old. Replacement copies are 75ϕ each.

Southwest Begonia Growers Association Meeting

Please complete and mail your reservation forms for the Get Together to be held in Texas March 8 through 11. The complete information appeared in the December issue of the Begonian.

Begonia Workshop

The newly formed Cheekwood Branch of the ABS and the Tennessee Botanical Garden are sponsoring a begonia workshop the weekend of February 24 and 25 at Cheekwood in Nashville. The show is open to Cheekwood Branch members and to members-at-large. For further information, contact Kit Jeans, Rt. #1, New Johnsonville, Tenn. 37134. Her phone number is (615) 535-2026.

Tropical Tour

A Study Tour to Costa Rica with Mildred E. Mathias, Ph.D., as instructor will be offered again this year by UCLA Extension. It will cover approximately the same territory that Thelma O'Reilly wrote about in her article in the *Begonian* last February. The dates are February 28 through March 13. The cost for the tour is \$600 course fee plus transportation of about \$430. The time left for enrollment is very short. To get additional information and reserve space, one should immediately call UCLA Extension, Department of Biological Sciences, (213) 825-7093.

Reference Materials

Research Director Millie Thompson will supply photocopies of any reference material on begonias which she has available in her large collection. There will be a small charge to cover the postage and price of photocopying but it will be kept to a minimum. Inquiries should also state whether the foreign language articles are among those wanted and which languages would be acceptable. The address for research references is

Mildred L. Thompson P.O. Drawer PP Southampton, NY 11968

New Officers

Please send both names and addresses of new branch officers to the ABS secretary, Virginia Barnett, as soon after elections occur as is possible.

MINUTES OF THE REGULAR MEETING OF THE BOARD OF DIRECTORS OF THE AMERICAN BEGONIA SOCIETY

The meeting was called to order at 7:50 p.m. by President Randall, in the South Gate Auditorium. Pearl Benell led the Pledge of Allegiance, and Gil Estrada read the Aims and Purposes. The minutes were read by the Secretary, and were approved as corrected. There was no correspondence.

President Randall read a letter from Kandid Litho concerning the raising of the price for printing the **Begonian** \$200.00 a month due to increases for paper and labor. This will have to be discussed further at the January meeting after some investigation.

Gil Estrada reported for the Bookstore; sales — \$215.55, disbursements — \$308.18, leaving a balance of \$2244.99 in that account. Gil moved that the money from the Curtis Prints and the Translation of the Japanese book be put in the Begonia Catalog Fund. Passed.

Second Vice President Doug Frost reported he had been looking for a different meeting place, but hadn't found one yet.

Eleanor Calkins, Treasurer, reported a balance on hand October 1, of \$1,844.00, receipts of \$3,990.82, disbursements of \$4,023.45, leaving a balance of \$1,811.37. Included in the balance is \$1,000.00 for the Show Fund and \$495.38 from the ABS Research Fund. A motion was passed to pay Thelma O'Reilly for the expenses as awards chairman. Also a bill for expenses of Loraine Frinchaboy as advertising manager. It was approved that the fidelity bond be paid. Bill Walton advanced \$248.56 for postage deposit and Mercury Malling which was approved for payment.

Business Manager Bill Walton reported making application for malling permit in Temple City. Also, he prepared material for placing a mailing permit in the Garden Grove Post Office. Mr. Walton moved that the two permits be secured. Passed.

Kathy Brown, Membership Secretary, processed 147 memberships. \$1,681.35 was deposited, and \$59.69 were the expenses.

Pat Maley, advertising manager, reported \$294.50 received, ad sales of \$409.37

including Christmas ads, and accounts receivable to date — \$554.70.

Round Robin Director Mabel Corwin had 21 flights come in, 2 flights were cancelled, and two new ones started.

Ed Bates said the magazine was ready to print. Walter Barnett requested that the people that donated for the show be listed in the **Begonian**.

Marge Lee sold four judging courses, and point scoring booklets, classification

booklets, and special sheets. Total income was \$46.25, expenses of \$25.33, leaving a balance of \$18.17.

Katharine Alberti opened a bank account for old **Begonians**. She had \$100.75, expenses for postage of \$12.18 leaving a balance of \$88.57. There are a good supply of back issues available to the membership.

Public Relations Director Diane Fries asked for help with her position. She is exploring different ways for publicity and attracting new members.

The Board approved the appointment of Carrie Karegeannes and Thelma O'Reilly as co-directors of Nomenclature.

A motion was passed to pay the bill for the Japanese translation from the Begonia Catalog Fund.

A motion to withdraw funds from the special account (\$1,000.00) was made by Gil Estrada, 2nd by Darlene Fuentes, for printing December **Begonian**. Passed.

printing December **Begonian.** Passed.

Bill Walton moved, 2nd by Sully Sullinger, that any monles spent outside the budget be approved by the Board. Expenditures approved by the budget can be pald by the Treasurer. Passed.

Jack Golding sent a letter requesting information concerning the Show. A motion was made that since the show in New York is to be the National Show and Convention only National Trophies be awarded. Passed. Regional Show Trophies should not be mixed in with a National Show. Unanimous.

North Long Beach extended invitation to have a regional show.

After branch reports, meeting adjourned at 10:30 p.m.
